

Workshop Dr. Rafael Andreiuolo

Sponsor: 3M

Title:

Ceramic Restorations Simplified: veneers and crowns.

Abstract:

All ceramic restorations have greatly advanced over the past decade. Novel materials and techniques have emerged enabling dentists to make procedures faster and more precisely. This 3-hour workshop is intended to provide theoretical and hands-on activities on ceramic veneers and crowns fabrication. Topics overviewed include modern teeth preparation, provisional restorations, impression techniques, rational ceramic material selection and comprehensive adhesive cementation.

Objectives:

1. Choosing the right ceramics for each case;
2. Minimally invasive approach: why, when and how?
3. Step by step contemporary veneer and crown fabrication;
4. Hands-on: Provisionals with bis-acrylic resin;
5. Hands-on: Impression;
6. Hands-on: Adhesive cementation with self-adhesive resin cements.
